## Cranstoun & Hussein Joining William Buck Australasian Network

---

It is with great pleasure that we announce that Cranstoun & Hussein is joining the prestigious Australasian network called William Buck.

The William Buck network has a 110 year history with offices in Sydney, Melbourne, Perth, Adelaide, Auckland and now Brisbane. As our clients, you will have access to a much broader range of resources, services and opportunities within William Buck.

Joining the network also significantly enhances our ability to provide better knowledge sharing, training and career paths for our Principals and Staff.

Most importantly, Cranstoun & Hussein and William Buck share the same commitment to providing clients with sound strategic advice, innovative solutions and service excellence.

Increasingly our clients operate in a complex and challenging commercial environment, so it is important that we expand and evolve our services, specialisations and technical expertise to meet these needs.

We note the following do not change;

- Our Principals and Staff servicing you;
- Our charge-out rates; and
- Our Name.

This is a tremendous opportunity for our firm and for our clients. We look forward to continuing the journey with you within the enhanced capability of the William Buck network.
